

## MARCO DDA UPVC TRUNKING SYSTEM

All Marco uPVC products are designed to achieve DDA compliance through the use of either a coloured centre lid or DDA Plates.

The Part M Building Regulations 2000 Amendment for the 'Access to and use of buildings' document outlines various regulations, including The Disability Discrimination Act (2005), which is designed to assist those with visual impairments in public buildings.

Marco DDA uPVC Trunking Systems have been installed in many projects nationwide, including:

- Schools & Colleges
- Public Libraries
- Hospitals and Health Centres
- Other Government and Public Buildings

The centre lid is available in light grey and charcoal.

DDA Plates are available in single and double-gang plates in the following colours:

- Light grey
- Charcoal
- Black
- Blue

Other colours available, subject to minimum quantity.

Further technical information is available upon request.
